

# SUBOXONE CLINIC

You Don't  
Have to Face  
Addiction  
Alone...

Ridgecrest  
REGIONAL HOSPITAL

**Our Suboxone Clinic**  
can help you get your life  
back on track.

**People don't plan to  
become addicted to substances.**

But they are highly addictive, and many  
people find themselves trapped.

**It's vital to get treatment.**

Substance use can be deadly, and  
accidental overdoses kill thousands of  
Americans every year.

**Addiction is a medical disease.**

One of the most effective treatments  
for it is Suboxone.

**UP TO 70%**  
success rate  
without  
relapses\*

\*Results may vary due to individual  
circumstances

## The Suboxone Clinic at Ridgecrest Regional Hospital

Our Clinic provides Suboxone to patients struggling  
with opioid addiction. It helps alleviate withdrawal  
symptoms almost immediately and helps  
control cravings and prevent relapses.

Once symptoms are under control, we can treat  
the underlying causes of addiction. We work  
closely with Ridgecrest Regional Hospital  
mental health professionals to get you the  
support you need.

### Our Suboxone Clinic is:

- **Outpatient**
- **Covered by most insurance**
- **Only for opioids** – Including heroin  
and prescription pain medications like  
Fentanyl, Morphine, Or Oxycodone.

## Our Treatment Philosophy

### **Addiction is a disease.**

We provide research-backed medication and treatments.

### **Addiction often accompanies other health conditions.**

Anxiety, depression, PTSD, past trauma, and other issues can contribute to addiction. We treat those as well.

### **You deserve compassion & respect.**

We provide understanding, non-judgmental care that meets you where you are.

### **We treat more than addiction. We treat you.**

We believe in treating the whole person. So, we have a variety of mental health practitioners on staff to help manage addiction-related issues.

**Many of our mental health services are available remotely.**

You have questions.  
**We have answers.**

### **How often do I have to go in for Suboxone treatment?**

For the first few weeks, you check in very frequently. Later on, you may check in monthly. The medication is a sublingual film that we'll prescribe, and you can take it at home.

### **How long will I have to take Suboxone?**

Some people take Suboxone for years. Often, others can taper off the medication after 6-12 months.

### **What happens if I relapse during treatment?**

We won't kick you out. We'll talk about it with you and get you the support you need to get back on track.

### **Will my treatment be covered by insurance?**

Our clinic accepts most private employer insurance and public insurance like Medicare or Medicaid.

The time to overcome  
**your opioid addiction**

# IS NOW

Restore your well-being and be there for the ones you care about.

Our addiction & mental health clinic is here to help with effective Suboxone treatment.
